- Assisted grant writing in concert with the American Philosophical Association leading to a \$600K grant from the Mellon Foundation

EDUCATION

App Academy

1000-hour immersive full-stack web development intensive boot camp

2017

Massachusetts Institute of Technology

Minor: Mathematical Logic

PhD Philosophy 2017

- Published research in *Noûs* and *Thought*
- Research in computability theory, modal logic, model theory, non-monotonic logic, and relevance logic

Brandeis University

Research in epistemic logic

MA Philosophy 2012

University of Zurich

Minors: Economics and Sociology

BA Philosophy 2010

PROJECTS

Andor

- Wrote an original logic game that teaches players the rules of the Boolean connectives using React, Redux, Cordova, and my boolean-logic library
- Achieved over 2,100 installs across Google Play and the Apple App Store

andor.fun

Sat Zoo

- Developed a benchmarking tool for Boolean satisfiability
- Incorporated Web Worker for seamless user experience
- Wrote custom text editor for easy creation of Boolean formulas

matthiasjenny.com/sat-zoo

boolean-logic

- Wrote a JavaScript library from scratch to formulas of Boolean logic relative to a model and to find models
- Implemented recursive algorithms for parsing strings into binary trees and evaluating well-formed formulas for truth and satisfiability
- Wrote 71 Jest tests for reliable and maintainable code

github.com/m1010j/boolean-logic

LivePoll

- Created a Poll Everywhere clone that allows users to create polls and push them to participants, using Rails, React, Redux, and AWS
- Incorporated WebSockets to push active polls to users and poll results to poll creator in real time
